About

Full Stack Developer that seeks answers to the problems that need to be solved. Desires growth to create beautiful programs and systems that can tell the stories of the teams who created them and those that are using them. With frontend, backend, and team conscious skills - let's cultivate storytelling in our technology together.

Skills	Front End	Back End	Other
Git	React	Python	Microsoft Office
Node.js	JavaScript	Django	Adobe Suite
Express.js	HTML5	SQL	Research
REST API / CRUD	CSS3	PostgreSQL	Customer Service
Object-Oriented Programming	SCSS / SASS	MongoDB	Team Building
Agile	Bootstrap	AJAX	Communication

Education

General Assembly: *Atlanta, GA*

Software Engineer Immersive Bootcamp: Full-Stack Developer Program.

- Created real world applications and learned modern tools to build and problem solve.
- Generated skills and knowledge in multiple stacks to prepare for real world application.
- Learned to pursue growth and find the necessary answers through communication.

SC Governor's School for Arts & Humanities: *Greenville, SC*

Thesis in Film, Animation, and Design; Minor in Sound Engineering

- Learned importance of growth mindset in the workplace and working efficiently with a team.
- Gained proficiency in design theory and how to construct eye catching products.

Experience

5/2019-3/2020 **Indah Coffee:** Lead Barista

- Created a system for inventory to develop an organized and efficient environment for my team.
- Assist in user transactions and online orders through third-party systems.

2/2017-5/2019 **Bridge Coffee House:** Lead Barista

- Assisted in developing sales systems for initial production of the new shop location.
- Learned how to market efficiently to a specified audience.
